

# Quiz App

# Problem Statement

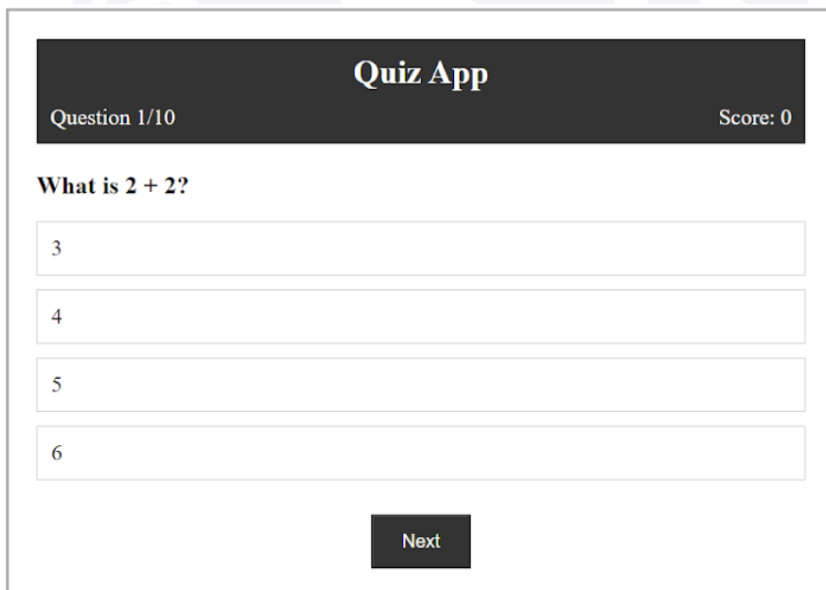

- Your task is to create a quiz application that will have 10 sample questions and answers.
- User can attend the quiz and as per his selection of option for a question he should be notified that the option he selected was correct or not by marking it to red or green.
- Score should be updated for the correct answer but there will not be any negative marking.
- After completion of quiz user can restart the quiz.
- You are allowed to add as many features you want.

# Tech Stack

- HTML
- CSS / Tailwind CSS
- JavaScript

# Sample Output

In case you are not getting that how UI should look, use this output image as a reference and create the website like this one. You can modify the UI design but make sure that it has atleast all the mentioned features in it.

The image shows a sample UI for a Quiz App. It features a dark header with the title "Quiz App". Below the header, there's a section for "Question 1/10" and "Score: 0". The question is "What is 2 + 2?". There are four input fields with the numbers 3, 4, 5, and 6. A "Next" button is located at the bottom right of the form.

# Submission Process

Submission process is similar to that of the assignment submission through the dashboard.

# Mandatory Process ([Process PDF Link](#))

**Step 1:** Create a local folder in your machine.

**Step 2:** Complete your assignment in that folder.

**Step 3:** Create a new repository on github for uploading this project over there.

**Step 4:** Upload your project in that repository by drag and drop or by using git commands (if you are aware of it).

**Step 5:** Submit the github repository link in the assignment submission of this project.

## Optional Steps

**Step 6:** Deploy your project on github pages, netlify or vercel (if you are aware of these platform).

**Step 7:** Add the deployed link in the about section of your github repository.

**Note:** Solution of this project will be provided to you after 1 week of uploading of this project, so it will be good if you are able to create and submit it within 1 week of time but there is no time limit is defined for its submission so take your time and create it.
